ABOUT

Education:

Bachelor of Science in Computer Science

[Your University Name]

[Location]

[Graduation Date]

Technical Skills:

Programming Languages: (List languages you are proficient in, e.g., Java, C++, Python)

Software Development: (Mention any specific tools or frameworks you are familiar with)

Database Management: (e.g., SQL, MySQL, MongoDB)

Web Development: (HTML, CSS, JavaScript)

Algorithms and Data Structures

Operating Systems: (e.g., Linux, Windows)

Networking: (TCP/IP, DNS, HTTP)

Version Control Systems: (e.g., Git)

Relevant Coursework:

List computer science courses that are particularly relevant to the job you're applying for.

Projects:

Include any significant programming projects or assignments you've completed during your studies.

Describe the purpose, technologies used, and your role in each project.

Internships and Work Experience (if applicable):

Mention any internships or part-time jobs related to computer science.

Highlight your responsibilities and achievements in these roles.

Academic Achievements:

Mention any honors, awards, or scholarships you received during your academic career.

Extracurricular Activities:

Include any computer science-related clubs, organizations, or hackathons you participated in.
